The story of how plants and flowers have shaped interior design for over 200 years From ferns in 19th-century British parlors to contemporary \"living walls\" in commercial spaces, plants and flowers have long been incorporated into the design of public and private spaces. Spanning two centuries, Nature Inside explores the history and popularity of indoor plants, revealing the close relationship between architecture, interior design, and nature. Studying the international modern interior through the lens of plants in the human environment, author Penny Sparke attributes a degree of the interest in indoor plants to urbanization, and, more recently, the climate crisis, which serve as ongoing reminders that people must maintain a connection to, and respect for, the natural world. While architectural and interior design styles have evolved alongside the popularity of various plant species, the human need to bring nature indoors has remained constant.

A Foodie Afloat is the story of a cook's journey through France on a barge. Di Murrell takes us on a gentle journey across France; her main preoccupation being to make sure that tasty food arrives on the table each day. As she voyages across the country she shows, through her recipes, how the cuisine changes with the landscape. Whether bought in the market, dug from a lock-keeper's garden or even foraged along the towpath, the food she finds and cooks is always seasonal and local to the region. This book is more than just a collection of recipes though. It is the result of a life spent on the waterways of Europe. She talks to lock-keepers, skippers of working barges and those, who, like her, find their sustenance on or near the canal. Di's enjoyment of good champagne, foie gras and truffles leads to an eclectic mix of simplicity and sophistication in her cooking. The boating life, though rarely sensational, is full of small events and chance encounters. This is an enticing story of slow boats and slow food. Di makes it come alive, and her combination of travel and recipe book tempts us to give up everything and join her on the waterways of Northern and Central France. A

7 Undeniable Truths... People do business with people or companies they know, like, and trust. The best way to connect with someone and build trust, is in person. And when that's not an option, the second best way to connect and build trust is with video. Online videos have exponentially more engagement than pictures and written text. Videos are used by companies of every size. Consumers expect/demand video. Most people are uncomfortable being on camera. There are countless ways to be bad on camera and most people make mistakes they don't even realize. There's no question that everyone in business, from Fortune 100 companies to solopreneurs, can leverage video to connect better with your target market, as well as existing customers. The problem is that most people aren't comfortable being on camera. Then an even bigger problem is that, once people come to grips with the fact that they have to be on camera, most people make mistakes that send the wrong message to the viewer. And the crazy part is that they have no idea they're sending a negative message on camera. Great On Camera is all about understanding everything you need to know so you can be your best on camera, connect with your target market, build trust, and make sales.
